Amendments to the Specification

Please amend the paragraph at page 30, lines 15-21 in the following manner:

To fit the fitting portion B of the tubular body to the sack, it is preferable to use, e.g., heat or ultrasonic wave in order to prevent air from leaking from the sack. FIG. 16-2 shows a specific configuration of the fitting portion B for achieving sure fitting. As shown, the fitting portion B has a ship-like cross-section or convex-like configuration that is superior to the circular cross-section from the above-stated standpoint.
